364 614€

Delivery Options

Factory delivery in France: this is ideal if you want to sail around the world starting from Europe. If you are not an EU resident, you will buy your boat tax free. If you are an EU resident, you will buy your boat with European Vat which adds 20%. An alternative solution is to start directly in the islands of your choice, VAT-free.

Shipping for French Polynesia: Sail Tahiti and Excess will manage the logistics of cargo shipping your catamaran to Tahiti and commissioning her directly in Papeete. The shipping cost will be offset by the savings on VAT and you start directly in the South Pacific…this is a fantastic option both from a cruising perspective and from a financial standpoint.

You want to know more about Excess Catamarans, choose a different boat set-up, or understand how you can get sailing in the South Pacific…
